

**National Interagency Coordination Center  
Incident Management Situation Report  
Sunday, July 29, 2007 - 0800 MDT  
National Preparedness Level 5**

**National Fire Activity**

Initial attack activity:	Light (138 new fires)
New large fires:	1 (*)
Large fires contained:	1
Uncontained large fires:	29
Area Command Teams committed:	2
NIMOs committed:	1
Type 1 IMTs committed:	8
Type 2 IMTs committed:	9
Fire Use Teams committed:	4

\*\* Uncontained large fires do not include WFU or confine/contain incidents. \*\*

**Northern Rockies Area (PL 5)**

New fires:	16
New large fires:	1
Uncontained large fires:	12
Type 1 IMTs committed:	2
Type 2 IMTs committed:	5
Fire Use Teams committed:	1

**Poe Cabin**, Craig Mountain Area Office, Idaho Department of Lands. IMT 1 (Stanich). Twenty three miles southwest of Grangeville, ID. Timber and grass. Moderate fire behavior with short runs, backing fire and isolated torching. Numerous structures remain threatened. Evacuations remain in effect.

**Chimney Complex**, Craig Mountain Area Office, Idaho Department of Lands. IMT 2 (Kusicko). Nineteen miles south of Lewiston, ID. Timber and grass. Moderate fire behavior with torching. Numerous structures remain threatened.

**Ahorn**, Lewis and Clark NF. IMT 1 (Bennett). IMT is also managing Novak, Little Wolf Creek and Meriwether fires. Thirty miles west of Augusta, MT. Timber litter. Active fire behavior with plume formation. Structures remain threatened. Evacuations remain in effect.

**Meriwether**, Helena NF. Thirty seven miles northwest of Helena, MT. Timber and grass. Active fire behavior, significant runs and plume domination. Structures remain threatened. Evacuations remain in effect.

**Rattlesnake**, Nez Perce NF. IMT 2 (Turman). IMT is also managing the Concord WFU. Twenty five miles south of Elk City, ID. Timber, timber litter and grass. Moderate fire behavior with running, torching and short-range spotting. Communities and recreation areas remain threatened.

**Garceau**, Flathead Agency, BIA. IMT 2 (Grant). Fifty five miles south of Whitefish, MT. Timber and grass. Active fire behavior, spotting and torching. Powerlines and structures remain threatened.

**Bridge**, Clearwater NF. Forty five miles southwest of Missoula, MT. Timber and understory. Active fire behavior with intensive burning. Structures and campgrounds remain threatened. Area closures remain in effect.

**Owl**, Yellowstone NP. IMT 2 (Wilder). Forty five miles south of Bozeman, MT. Timber and grass. Precipitation occurred over the fire area yesterday. Smoldering. Structures remain threatened.

**Skyland**, Flathead NF. IMT 2 (LaFave). Forty five miles east of Whitefish, MT. Timber, litter and understory. Active fire behavior with crowning, running and spotting. U.S. Highway 2 closed at East Glacier, MT. Structures remain threatened. Campground and trail closures remain in effect.

**Sawmill Creek**, Lolo NF. Twenty two miles southeast of Missoula, MT. Timber. Short-range crowning, torching and backing. Structures remain threatened.

**Pattengail Creek**, Beaverhead/Deerlodge NF. Ten miles northeast of Wisdom, MT. Timber with bug-kill. Isolated torching.

**Fool Creek**, Lewis and Clark NF. FUMT (Hall). Thirty miles northwest of Choteau, MT. Timber litter. Increased fire activity with some torching.

**Concord**, Nez Perce NF. Twenty miles southwest of Elk City, ID. Timber litter. Increased fire activity with isolated torching and short-range spotting. Structures remain threatened.

**Mile Marker 124**, Southwestern Land Office, Montana DNR. Nineteen miles southeast of Missoula, MT. Timber, and grass. Running and backing. Structures threatened.

### **Eastern Great Basin Area (PL 5)**

New fires:	7
New large fires:	0
Uncontained large fires:	10
Area Command Teams committed:	1
Type 1 IMTs committed:	5
Type 2 IMTs committed:	1
Fire Use Teams committed:	2

Area Command Team (Ribar) is assigned to manage large fires for the Boise and Payette National Forests.

**Cascade Complex** (4 fires), Boise NF. IMT 1 (Opliger). Three miles northeast of Cascade, ID. Timber and timber litter. Extreme plume-dominated, crown fires and short and long-range spotting. Communities and structures remain threatened.

**East Zone Complex** (3 fires), Payette NF. IMT 1 (Pincha-Tulley). Thirty miles northeast of McCall, ID. Timber litter, brush and grass. Active fire behavior with torching and running. Communities, bridges, campgrounds and numerous structures remain threatened.

**Middle Fork Complex** (5 fires), Boise NF. IMT 2 (Harvey). Fifteen miles northeast of Garden Valley, ID. Timber and brush. Extreme plume-dominated fire behavior with sustained crown runs and long-range spotting. Lookout evacuated and structures remain threatened.

**Murphy Complex** (2 fires), Twin Falls District, BLM. IMT 1 (Hawkins, Molumby). Fifty six miles southwest of Twin Falls, ID. Brush and juniper. Active fire behavior with running and creeping. Numerous communities and ranches remain threatened.

**Trapper Ridge**, Boise NF. FUMT (Hahnenberg). Twenty-eight miles northeast of Idaho City, ID. Timber and hardwood litter. Active fire behavior with torching and short-range spotting. Structures remain threatened.

**Salt Creek**, South Central Area, Utah Division of Forestry. IMT 1 (Ruggiero). Five miles east of Nephi, UT. Chaparral, timber and grass. Minimal fire behavior.

**Van Horn**, Salmon-Challis NF. Fifteen miles north of Challis, ID. Timber litter, snags, dead and down timber. Torching, short crown runs and creeping.

**Granite Creek**, Bridger-Teton NF. Fifteen miles southeast of Jackson, WY. Timber, dead and down timber. No further information received.

**Raines**, Payette NF. Thirty eight miles northeast of McCall, ID. Timber and grass. Active fire behavior with torching. Structures remain threatened.

**Krassel Complex** (6 fires), Payette NF. Transfer of command from FUMT (Perkins) to FUMT (Ourada/Soper) yesterday. FUMT is also managing the Raines fire. Forty-four miles northeast of Yellow Pine, ID. Grass, brush, timber litter and downed logs. Active fire behavior with torching.

**Black Pine 2**, Sawtooth NF. Started on private land eleven miles southeast of Malta, ID. Timber, grass and brush. Minimal fire behavior.

**Dakota Hill** (5 fires), Zion NP. Twelve miles northeast of Springdale, UT. Hardwood litter, dead and down timber, grass. Minimal fire behavior. Precipitation occurred over the fire area yesterday.

Predictive Services Discussion: **Gusty winds in combination with mixed wet and dry thunderstorms are expected today in the Northern Rockies.** Windy conditions are also expected east of the Cascades in Washington and Oregon. Isolated mixed wet and dry thunderstorms are possible in the central Sierra and across Nevada with wetter storms further south and east.

## WILDLAND/URBAN INTERFACE WATCHOUTS

The primary consideration is to first assure firefighter and public safety. It is a must to assess potential fire behavior, ingress/egress routes, nature of the threat, hazardous materials, and available water supplies before engaging in the protection of any structures. The first step in conducting a safe operation is to assess whether the firefighting operations can be conducted safely.

● Consider the “Wildland/Urban Interface Watchouts” in completing a risk analysis for the urban interface area to be protected. Remember there are three categories of structures:

- Those that are not threatened.
- Those that are threatened.
- Those that have already been lost or too dangerous to protect.

● Wildland/Urban Interface Watchouts:

- Poor access and narrow, one-way roads. A rapidly spreading fire could trap apparatus and personnel before they can turn around or move away from the flames and smoke.
- Observe bridge limits. Exceeding bridge limits could lead to bridge failure with a resultant blocking of ingress/egress routes that could result in the loss of an escape route or loss of equipment.
- Inadequate water supply. Without a reserve supply of water, the fire can overtake an area before the fuels can be cleared away.
- Natural fuels are located 30 feet or closer to structures on level ground. Remember structures on slopes require greater clearance. Structures are located on canyon slopes or “chimneys” on slopes of 30% or more with continuous, flashy fuels. The resulting rate of spread of any fire in this terrain can quickly extend beyond control.
- Extreme fire behavior: Situations involving crowning, large flame heights and erratic fire behavior can extend in an unpredictable manner beyond the control of any number of personnel. Strong winds of 25+ MPH: Winds increase the chance of spotting over the heads of firefighters and trapping them between both fire areas. Winds also cause greater preheating of fuels in the path of a fire front.

● continued...

- The need to evacuate the public, livestock, pets, and/or animals. This critical activity can pull personnel from the firefighting activity and can distract attention from fire behavior at a time when the greatest alertness is needed.
- Propane and above ground fuel tanks that are next to wooden structures or close to vegetation
- Power lines and poles: What is their location in relation to the structures that are being protected? Watch for both overhead and downed power lines.
- Local citizens are attempting suppression activities. Lack of knowledge in fire suppression may lead to unsafe tactics.
- Airtanker retardant drops and helicopter bucket operations: Establish communications and keep fire personnel out of the drop zone.
